**HCSE
2010**

The APEX framework: prototyping of ubiquitous environments based on Petri nets

**José Luís Silva, Óscar R. Ribeiro, João M. Fernandes,
José C. Campos and Michael Harrison**

October 2010

Supported by the Fundação para a Ciência e Tecnologia (FCT, Portugal)

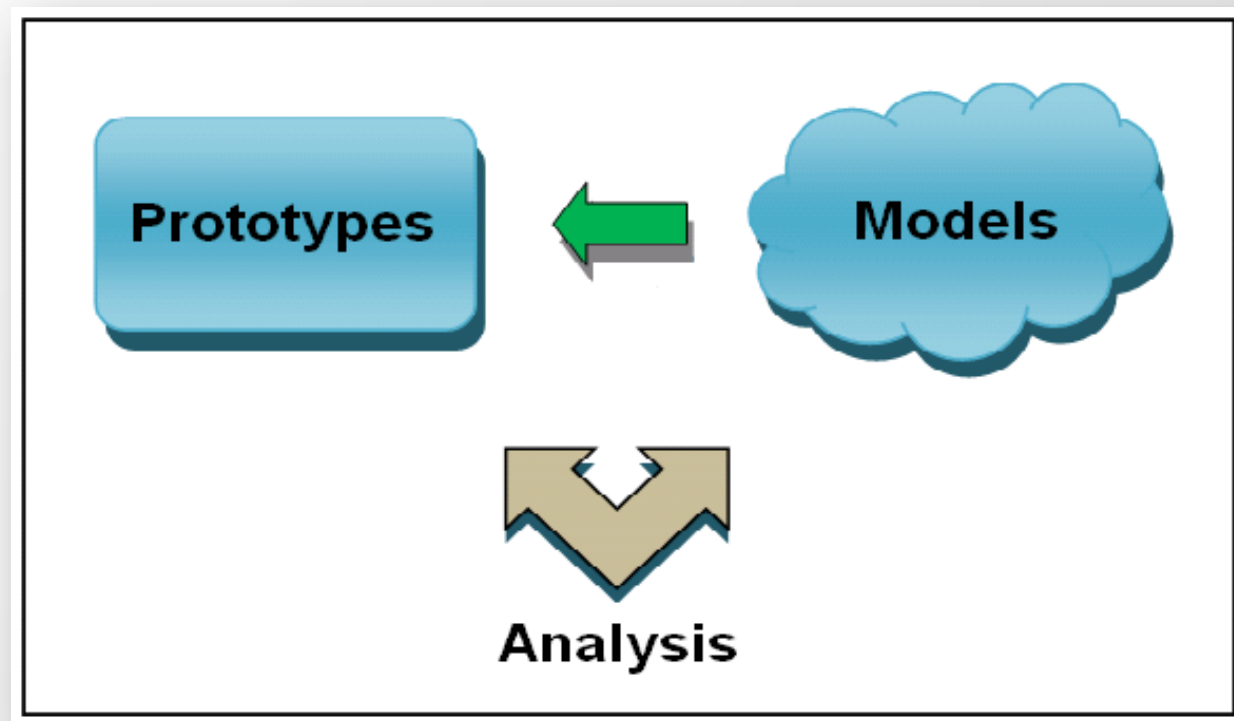

Summary

- Introduction and Objectives
- Background
- Proposed Approach
- Library Case Study
- Synopsis, Ongoing and Future Work

Introduction and Objectives

- ▶ Context-aware applications
 - Personalized services to users through the integration of environmental information (context)
 - spatially located using sensors
- ▶ New evaluation challenges
- ▶ Objectives
 - Rapid prototyping and evaluation of ambient intelligence systems through
 - Modelling
 - Simulation

Framework

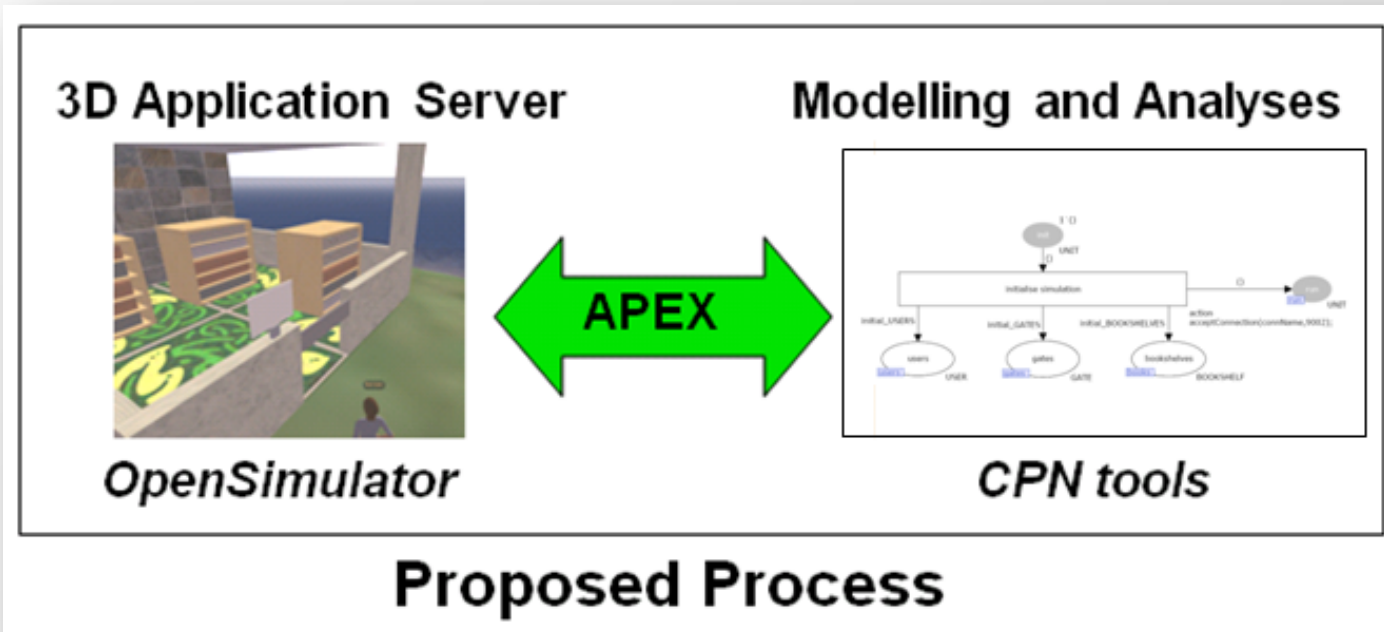

Modelling approach

- ▶ Focus on the interaction between the user and the system
 - Ubiquitous system models
 - Property checking and simulation
- ▶ **CPN (Colored Petri Nets)**
 - Other approaches possible

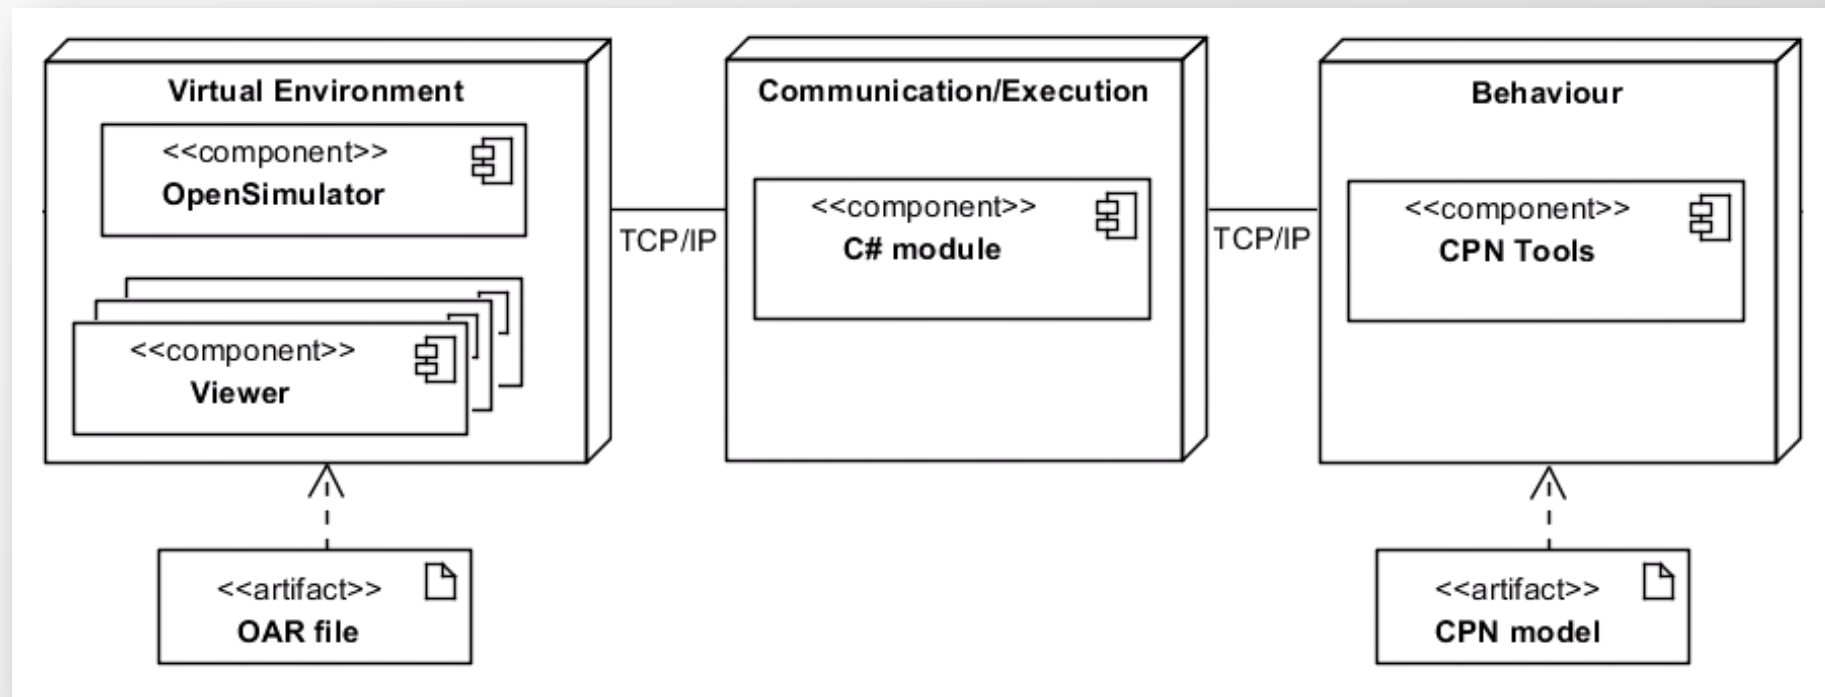

Prototyping approach

- ▶ Uses a 3D Application Server
 - OpenSimulator (opensimulator.org)
- ▶ Simulation
 - Models virtually a situation that can be studied to see how the system works
 - Explores the experience of using virtual systems as feedback about the proposed design
- ▶ Comparable with
 - Topiary
 - UbiWorld
 - 3DSim
 - work of O'Neill et al.
- ▶ Integrates formal analysis with experience of virtual environments

Proposed Approach

Architecture

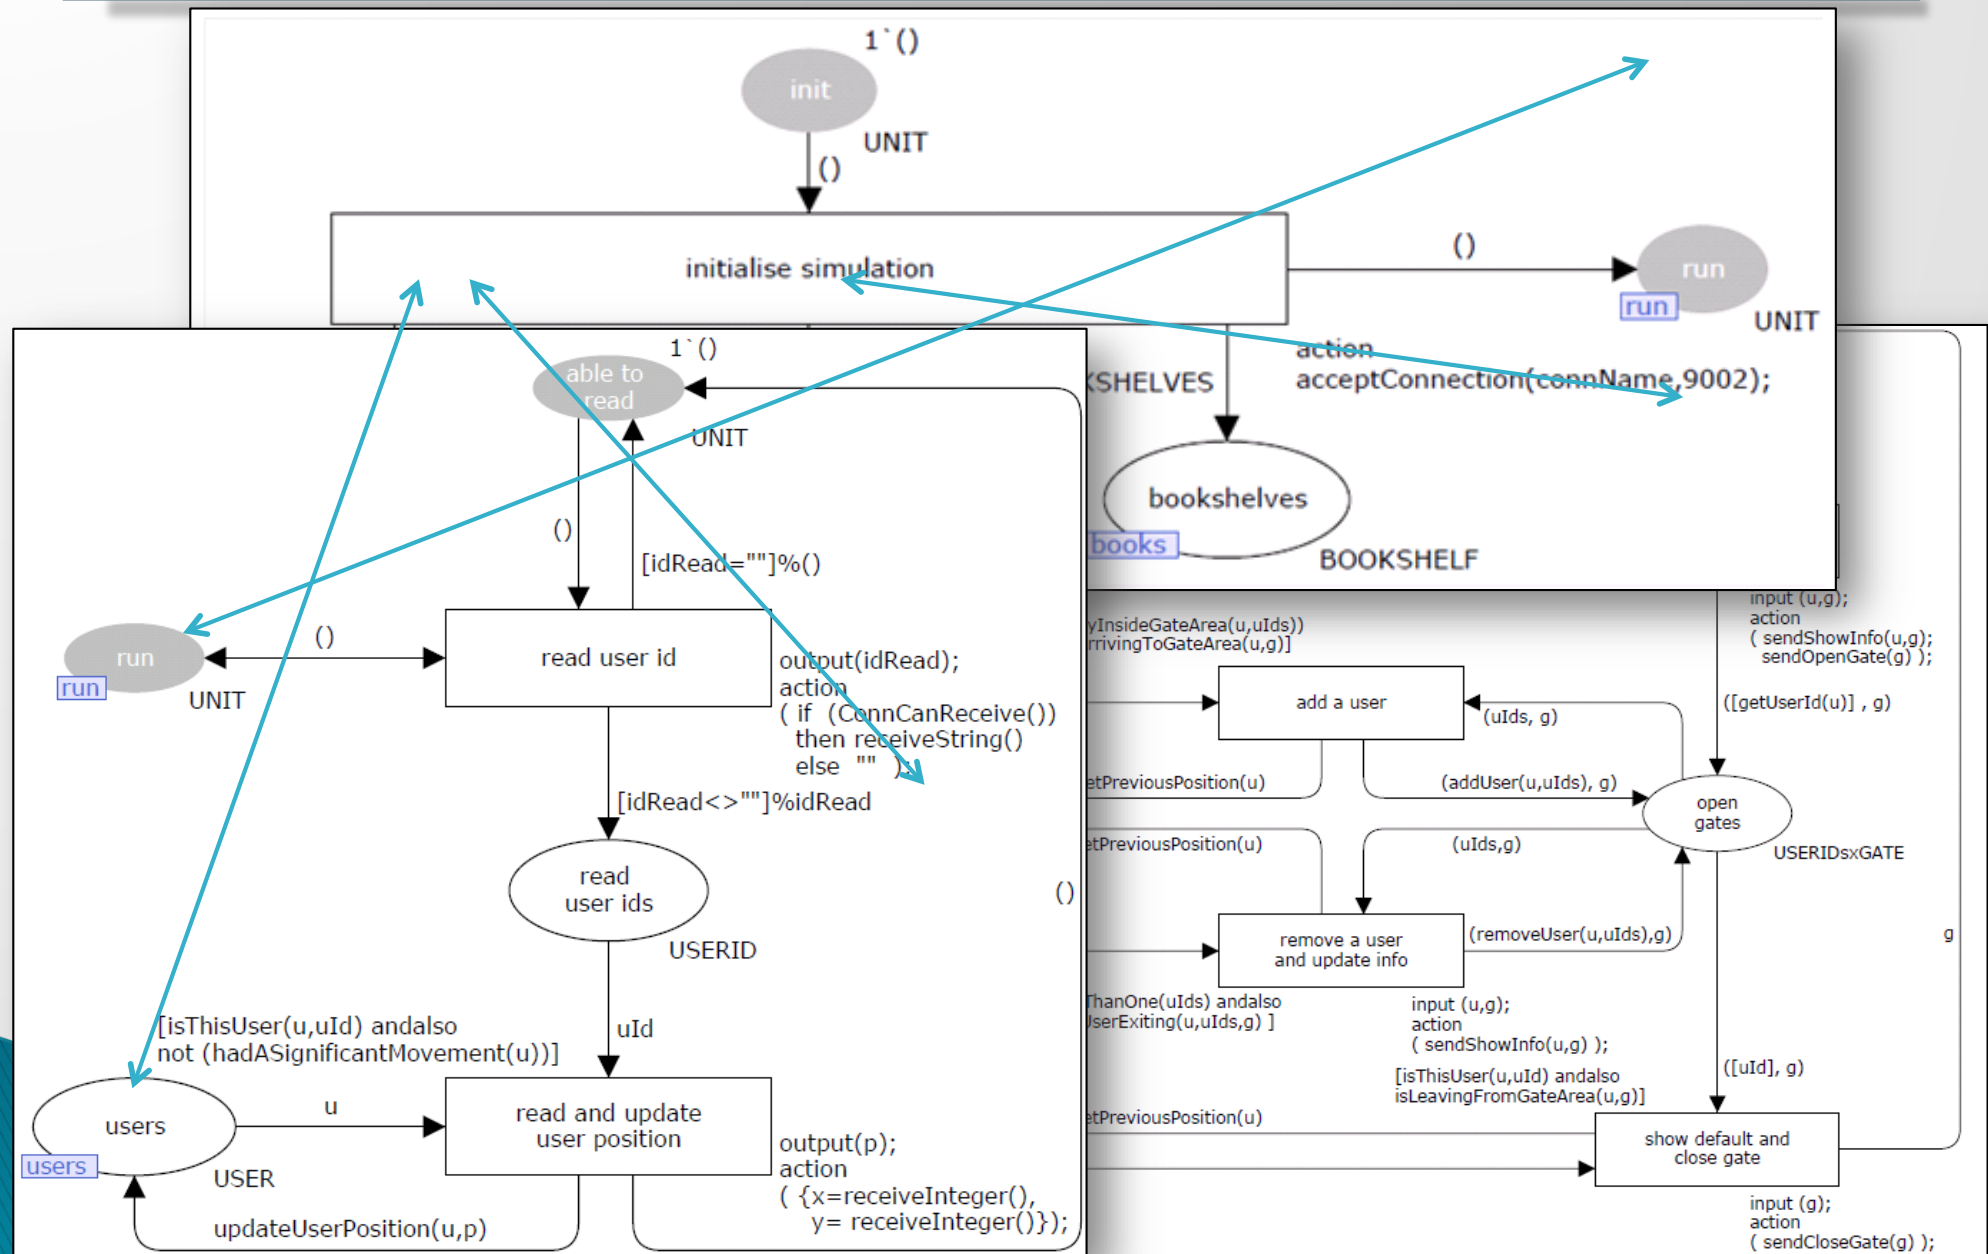

Architecture

- ▶ Approach to modelling
 - CPN model guideline
 - Easy to setup
- ▶ Virtual environment
 - Viewers
 - Easy to create
 - Many users

Library Case Study

Modelling

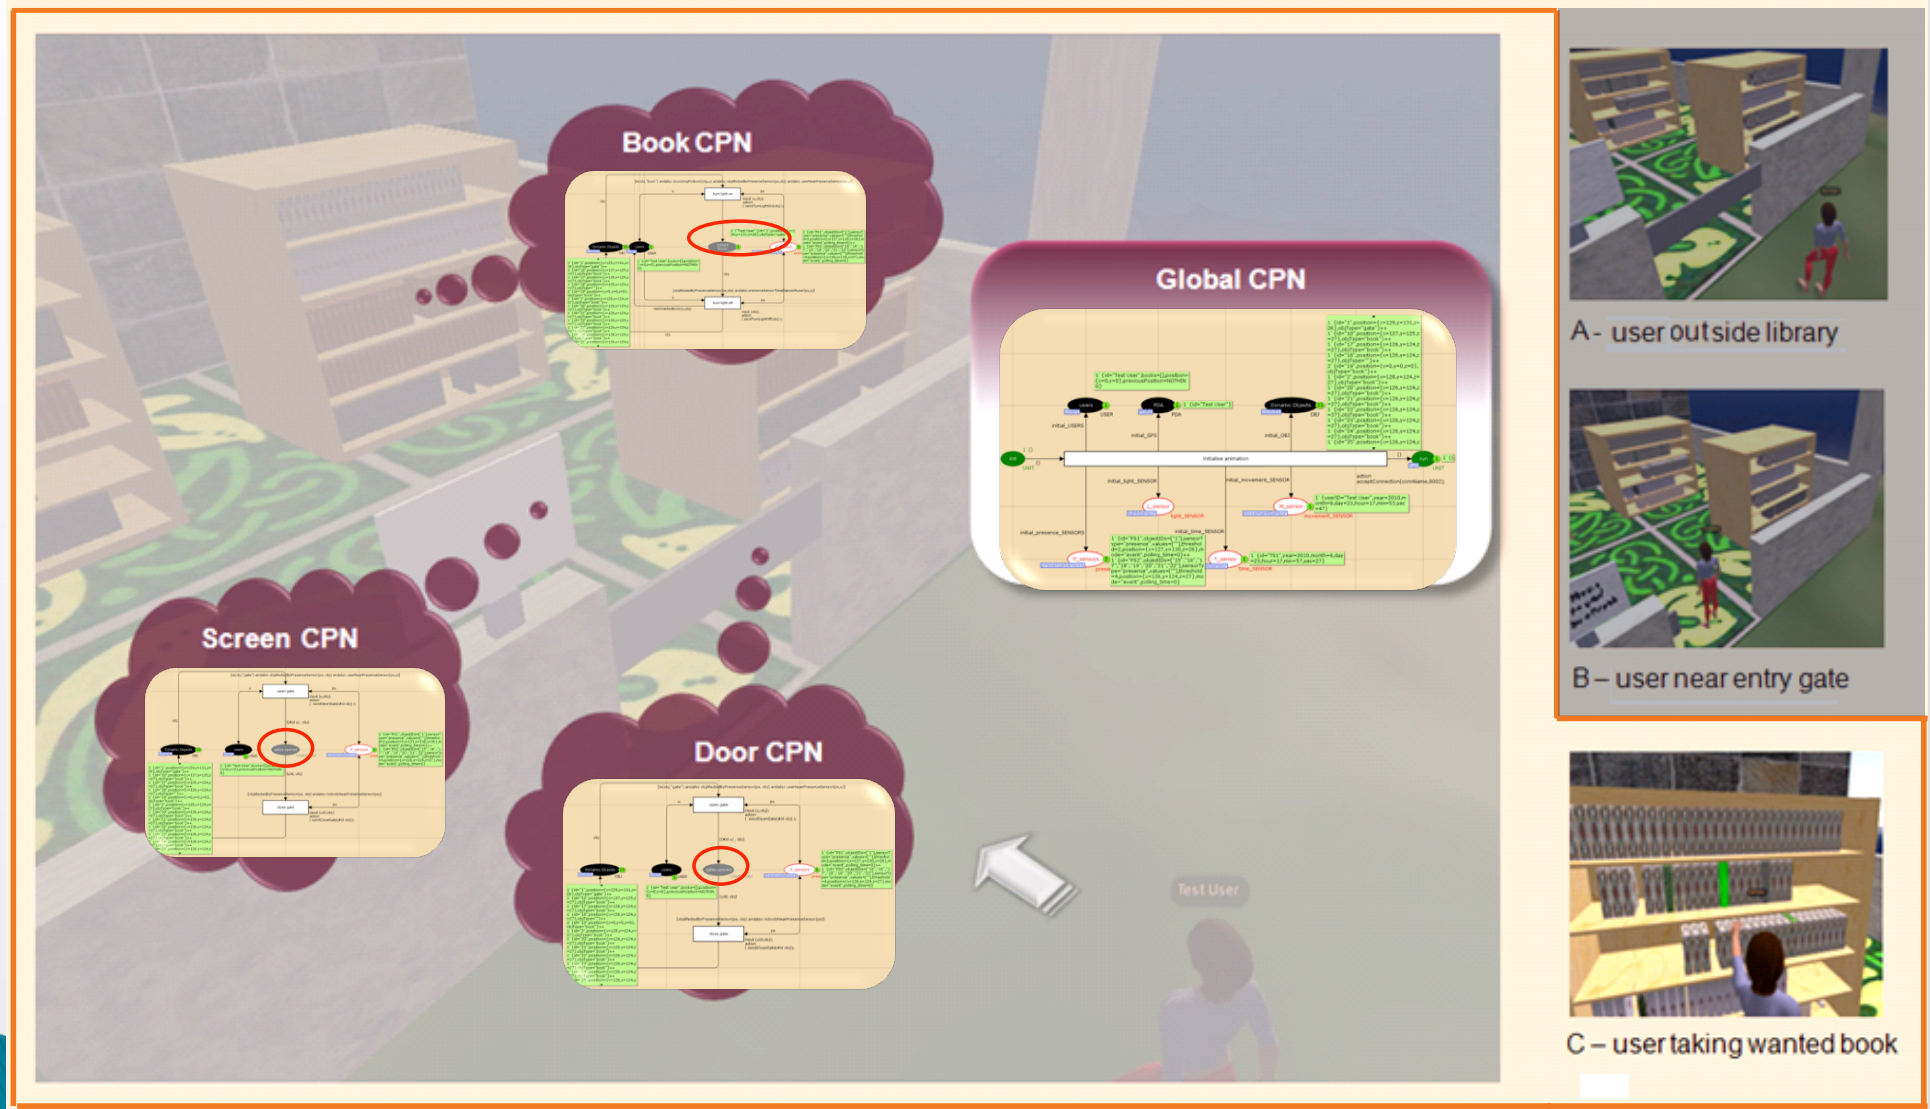

APEX framework

APEX framework

APEX framework

Summary

- ▶ An environment for ubiquitous systems analysis and simulation
 - Simulation allows navigation, and interaction, both explicitly and implicitly, with (virtual) devices
 - Analysis using *CPN tools*
- ▶ Supports evaluation of usability and social impact of the design

Ongoing and Future work

- ▶ Support for plug and play construction of virtual environments
- ▶ Perform usability studies
- ▶ Interchanging the physical and the virtual
 - mobile devices
 - Human users vs. autonomous users
- ▶ Link to a CAVE (Cave Automatic Virtual Environment)

Questions

Thank you!
