Consulting

WeDo offers a wide range of business consultancy services, through its Business consulting division, Praesidium.

Products

Product suite aimed at the Telecommunication operators covering their needs in terms of business systems

Systems Integration

WeDo provides services in the areas of Relationship Management, Decision Support, Net Business, Systems Integration and Support and Customized Software Development.

- **Our Products Solutions are focused on Telecom Business niches – Roaming, Revenue Assurance, Collections, Incentives,...**
- **They integrate Telecom Business Knowledge and Telecom IS Know-how**
- **They are Core Information Systems Independent – Billing, CRM, ERP, Mediation... though they fully integrate with them**

Products

- **Audit & Review** - undertaken for all products and services, or across all networks and systems, or alternatively focused only on specific elements considered to be exposed to risk
- **Analysis & Investigations** - a range of different support services, including data analysis, risk quantification, investigations and testing services, conducted either on-site at the client or remotely from our offices
- **Organisational Development** - the creation and enhancement of the client's risk management organisational capability, including assessments, operational development, training and recruitment services
- **System Utilisation** - supporting clients through the different stages of deploying systems to manage risk across the business

- **Billing** – with an extensive experience developing, integrating and upgrading billing systems to meet today's business and convergence requirements.
- **OSS** – deployment of OSS platforms and implementation of provisioning solutions for fix, mobile and convergent complex Telco offers.
- **DW** – acting as an integrator for Business Intelligence Solutions specialized on the implementation of Data Warehouses, Data Marts, Executive Information Systems, Data Mining based solutions and Data Quality.
- **CRM** – acting as an integrator for the implementation of CRM and PRM solutions to manage and unify contact channels covering the main areas – front office, service, support, marketing and sales force automation; Managing Partners, revenue share contracts and incentives.
- **Internet & VAS** – acting as an integrator for Internet and Value added services area, WeDo specialized in mobile technologies, such as SMS, MMS and Mobile Portals. Today is an active player in IMS integration area for NG telecommunication networks.
